PERSONAL PROJECTS

E-commerce Website (07/2023)

- Developed a fully functional e-commerce platform using React.js, Redux, and SCSS.
- Ensured optimal user experience across various devices by implementing responsive design principles, resulting in consistent performance and usability on desktops, mobile devices, and tablets.
- Implemented features allowing users to easily add/remove items from their shopping carts.
- Designed captivating product listings with detailed descriptions and appealing images for an engaging user experience.
- Optimized the project for efficient performance and visually appealing user experience.

Car Rental Website (05/2023 - Present)

- Developed a dynamic car rental website with enhanced interactivity using React, CSS, and Material UI.
- Enabled users to browse available cars with enticing images and comprehensive descriptions.
- Implemented functionality for users to select rental dates, calculate costs, and make reservations.
- Ensured accessibility and responsiveness across various devices for a smooth user experience.
- Continuously refining and updating the website to meet evolving user needs and technological advancements.

Personal Portfolio Website (08/2023 - Present)

- Created a React.js portfolio to showcase my front-end development skills.
- Executed a responsive design to ensure a seamless user experience on various devices and screen sizes.
- Employed React Router for smooth navigation for visitors exploring my work.
- Showcased skills and projects effectively to demonstrate proficiency in web development.
- Continuously refining and expanding the portfolio to showcase evolving skills and projects, demonstrating a commitment to personal growth and professional development.
